

A checklist, to help you with the planning

Have you considered people's roles for your data management plan?

Have you defined your forms, or found standardised scales/questionnaires to use?

Have you defined answer possibilities for your questions?

Have you identified your NEED to have data points?

Do you have limits for your numeric values?

Have you sketched the process?

Have you decided what data to collect at what time point?

Have you considered what 'unexpected' scenarios you want to collect data on?

Have you considered your studies impact on the clinicians work-flow?

Have you designed a rigorous testing plan and allocated enough time?
